EXERCISES

QUESTION 1: THE CONCEPT OF SOVEREIGNTY. "The concept of sovereignty is a legal fiction" (Jean Bodin). Discuss the validity of this statement in the context of contemporary international law.

ANSWER: The concept of sovereignty has evolved significantly since the 16th century. While Jean Bodin's view that it is a legal fiction holds some merit in describing its historical origins, contemporary international law recognizes it as a principle that governs the relationship between states. It is not merely a fiction but a fundamental principle that underpins the international legal system.

Furthermore, the concept of sovereignty is essential for the functioning of the international system. It provides a framework for the allocation of rights and responsibilities among states. While there are challenges to the absolute nature of sovereignty in the 21st century, such as the rise of international organizations and global issues, the principle remains a cornerstone of international law. It is not a mere legal fiction but a practical reality that shapes the interactions between states.

In conclusion, while the statement that sovereignty is a legal fiction is partially correct in its historical context, it is largely incorrect in the context of contemporary international law. Sovereignty remains a fundamental and practical principle that governs the international system. It is not a mere legal fiction but a principle that shapes the relationships between states and provides a framework for the allocation of rights and responsibilities.

QUESTION 2: THE EMERGING POWERS. "The emergence of emerging powers is a challenge to the international system" (John Ruggie). Discuss the implications of the rise of emerging powers on the international system and the role of the United Nations.
