

Figure 4.8: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.9: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.10: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.11: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.12: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.13: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.14: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.15: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.16: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.

Figure 4.17: A diagram illustrating the concept of a function. It shows a set of inputs on the left and a set of outputs on the right, with arrows representing the mapping from inputs to outputs.
